# Media Walls

Twin rise & fall plasmas and camera in video conference room, back lit with red LED's

Panel mounted plasma and glass door cupboards in ABW and burr walnut border

Rise & fall plasma, with white glass and American black walnut

Media wall demonstrating hidden whiteboard, flip chart holder and storage with matching lectern

Media walls within video conferencing suites or in boardrooms with audio visual facilities can be designed to fit exact technical requirements and perfectly coordinate with the associated table and furniture. Rise and fall mechanisms can be incorporated to allow a plasma screen to be securely hidden away then to dramatically appear at the press of a button. The skillful lining up of veneered panels, together with expert on site scribing will also give a really perfect result that won't fail to impress!
