

# Change Tables

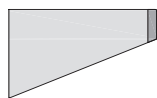

Why CHANGE? Because sometimes you'll need that meeting room for another function, be it for a conference or a stand up function. CHANGE offers all the elegance of a classic boardroom table with excellent demount-ability enabling quick and easy clearance. The operation can be generally achieved by one person, with some help with the loose leaf tops, if applicable. The tables have independent levellers to give a uniform look, but once raised they are easily wheeled away on integral castors. The width of the folded table is designed so it can pass through a 900mm office door aperture to be stored in an adjacent room. These tables are made from the highest grade veneers and solid timbers (guaranteed by FSC audit to be from fully sustainable sources). CHANGE comes with its own range of complementary stacking boardroom chairs, available in coordinating solid timbers and a wide range of fabrics and high quality leather.

## Edges

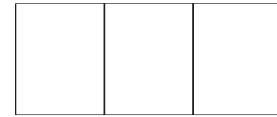

3 Star - 30mm thick, Banded timber lipping

Square 30

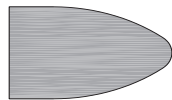

Chamfer

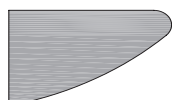

Change tables are available normally with 3 Star edges allowing side square to butt. However the long edges can be profiled to add a more distinctive look.

## Side Profile Edges

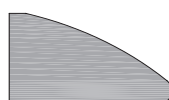

5 Star - 30mm thick, 45mm wide add on lippings

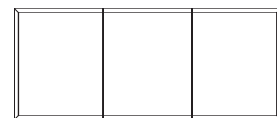

Aerofoil

Surf

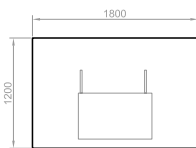

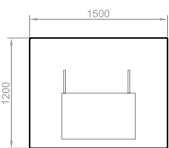

Hydro

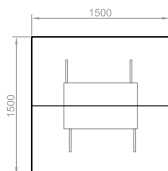

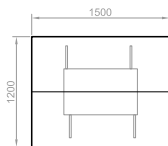

5 Star edge profiles can only be specified when to be used exclusively on individual tables, or on long edges and to three sides when tables are in configurations.

## Module Styles

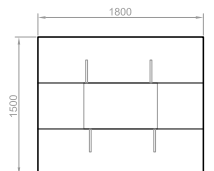

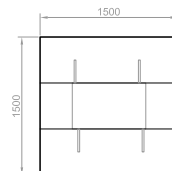

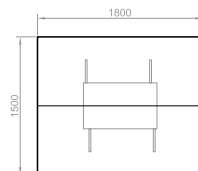

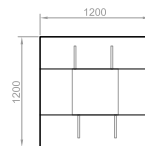

Single Flip

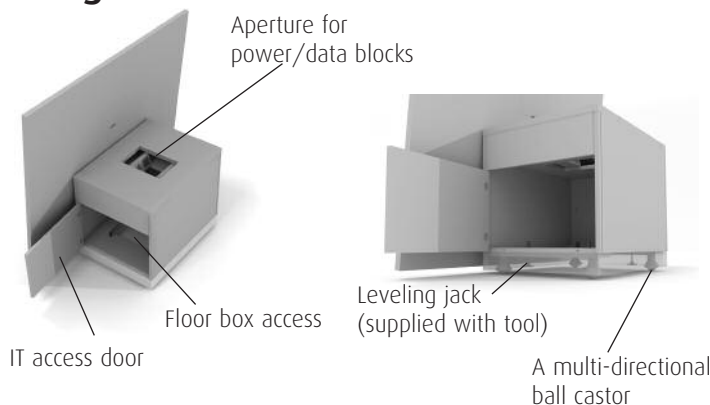

Twin Flip

Drop Leaf

## Change base features
